01 / ABOUT CALTROS

One connected packaging brief.

From material choices to a defined supply plan.

Caltros brings together packaging materials, finished packaging and sourcing support. We discuss your intended use, material requirements and customization needs, then coordinate the specification and supply arrangements around your project.

01 Materials & formats

Packaging films, flexible packaging, paper packaging and woven bags.

02 Requirements first

Review dimensions, printing, artwork and sample requirements together.

03 Supply coordination

Films are supplied through partner suppliers; the grade is confirmed in the quotation.

Illustrative image

Tell us what is already defined - and what still needs discussion.

02 / PACKAGING FILMS

Packaging Films

Select the material around the application and converting process.

Illustrative image

Illustrative image

BOPP

Transparent, matte, pearlised and tobacco-overwrapping films. Sealing options depend on the type and grade.

CPP / VMCPP

CPP and metallised CPP options. Confirm the grade, application and converting requirements.

BOPET

Discuss the application, thickness, width and grade-specific technical data.

BOPA

Define the intended application and converting requirements before confirming the grade.

BOPE

Glossy and matte oriented PE films for printing, bag conversion and lamination with other PE layers.

Specialty Films

Functional BOPP, label films, thermal-lamination films, metallization and barrier options, and coated overwrap.

Technical data available on request. Final selection is subject to confirmation.

03 / FLEXIBLE PACKAGING

Flexible Packaging

Printed rollstock and pouch formats for your product.

Illustrative image

Printed Laminated Rollstock

Printed laminate for equipment that forms, fills and seals the pack. Confirm roll width, print repeat, winding direction and sealing requirements.

Illustrative image

Three-side Seal Bags

Flat pouches with three sealed edges and an opening for filling.

Illustrative image

Stand-Up Pouches

Bottom-gusset pouches for upright presentation; a zipper can be specified.

Illustrative image

Flat Bottom Pouches

Side and bottom gussets create a structured pack with printable faces.

Illustrative image

Back Seal Bags

Pillow-style packs with a longitudinal back seal, matched to the filling process.

04 / PAPER PACKAGING

Paper Packaging

Cups, bags and boxes shaped around your product.

Illustrative image

Paper Cups

Share the capacity, beverage type, printing and lid requirements.

Illustrative image

Paper Bags

Define dimensions, product weight, handle preference and artwork.

Illustrative image

Paper Boxes

Confirm product dimensions, box construction, finish and packing method.

Paper, finish and supply requirements are confirmed for each project.

05 / WOVEN BAGS

Woven Bags

PP woven valve bags for dry powder products.

Illustrative image

Discuss bag construction around your contents, fill weight and filling equipment. Dimensions, valve form, fabric requirements, lamination, liners and printing are confirmed for each project.

APPLICATIONS

Cement · Lightweight plastering gypsum · Self-leveling mortar
Tile adhesive · Putty · Mortar · Chemical powder

Blank / custom print

Confirm print colors, artwork and panel layout with your project brief.

06 / QUALITY & SUPPLIER DOCUMENTATION

Quality & Supplier Documentation

Supplier documents and material-specific third-party reports.

BRCGS

Supplier documentation

ISO 9001

Supplier documentation

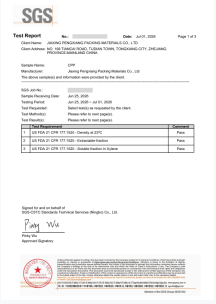

ISO 14001

Supplier documentation

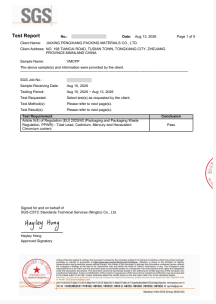

PRODUCT TEST REPORTS

Material-specific third-party test reports are available on request, according to the selected material, grade and application.

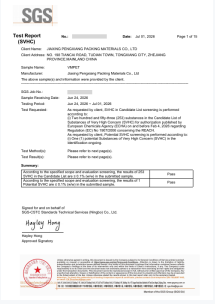

CPP Film / FDA

Supplier test report

VMCPP Film / PPWR

Supplier test report

VMPET Film / REACH

Supplier test report

Results apply only to the samples, materials and test conditions stated in each report. Third-party reports are available on request where applicable.

Documentation available on request.
Certificates and test reports apply to the relevant materials, grades and test conditions.

07 / HOW WE WORK

How We Work

Clarify the requirements before confirming the supply plan.

01

Inquiry

Share the contents, intended use, quantity and destination.

02

Requirement clarification

Review dimensions, material needs and the filling process.

03

Product / structure confirmation

Discuss the format, material structure and printing.

04

Sample or specification review

Set out sample requirements and specifications to be confirmed.

05

Commercial confirmation

Review the quotation and order arrangements.

06

Production / sourcing coordination

Confirm supply arrangements for the agreed specification.

07

Shipment planning

Confirm inspection, packing and transport requirements.

Availability, commercial terms and delivery arrangements are subject to confirmation.

08 / CONTACT

Let’s Talk Packaging.

Start with your product and the details you already know.

Send your packaging brief or submit an inquiry through our website. Include the contents, application, dimensions, material or format, quantity and delivery destination.
